Sibling Play Study

- The University of Miami’s Department of Psychology is looking for families with a minimum of two siblings (the younger diagnosed with Autism Spectrum Disorder) between the ages of 7 and 12.
- Siblings will answer questions, solve puzzles, and build with blocks.
- Parents will also answer questions about their children.
- Each child gets a $10 Amazon gift card for participating!
- Family members must be fluent in English.
- Help us better understand how sibling relationships develop.
